

Bluetooth Keyboard User Manual

Keyboard Specification:

1. Bluetooth 3.0 interface standard
2. Operating Distance to 10 meters.
3. Modulation System:GFSK
4. Operatin Voltage:3.0-5.0V
5. Working Current:<5.0mA
6. Standby Current:2.5mA
7. Sleeping Current: <200 μ A
8. Charging Current: \geq 100mA
9. Standby Time:30days
10. Charging Time:4-5hours
11. Lithium Battery Capacity:160mA
12. Uninterrupted Working Time:55hours
13. Lithium Battery Life:3 years
14. Lithium Battery Specifications: 45*16*5mm
15. Key Strength:80 \pm 10g
16. Key Life:5 million strokes
17. Operating Temperature:-10 -+40 $^{\circ}$ C

pull out the metal frame

pull out the black plastic from the slot

pull out the black plastic according to the arrow, to adjust the depth of the stand.

FCC Certification Requirements

Caution: Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
